

AVer and Biamp Smart Camera Tracking Solution: Powerful Collaboration, Perfectly Synced

Intelligent Camera Tracking Advantage

The AVer and Biamp solution combines intelligent camera tracking, Biamp Parlé conferencing microphones, and advanced Beamtracking™ technology to deliver crystal-clear audio and pristine visuals. This powerful integration identifies and tracks active speakers, transmits voice data to AVer cameras, and makes real-time camera adjustments. The result? Seamless, dynamic, and a new level of productive collaboration. From mid-sized meeting rooms to boardrooms, every voice is heard loud and clear, and every face is in sharp focus, every time.

💡 Ideal for Medium-Sized Rooms and Up

The AVer-Biamp solution is perfect for medium-sized meeting rooms, accommodating up to 15 participants. This setup ensures optimal performance of the Beamtracking™ technology to capture and track all active speakers without any loss of audio or video quality. Enhance your meeting experience with clear visuals and sound, no matter where participants are seated.

🎯 Key Features

- Beamtracking™ Technology:**
Automatically identifies and follows active speakers in the room, keeping them in focus for remote participants and creating a more immersive experience.
- Real-Time Camera Actions:**
Harness dynamic data streams for swift and precise camera movements, allowing for responsive adjustments on the go during video conferences and a more natural way of communicating.
- Multiple Tracking Modes:**
Select from Presenter Tracking, Zone Tracking, or Hybrid Mode to optimize visual coverage for various meeting formats.
- Simplified Setup and Operation:**
Simplify traditional conferencing setups with intuitive interfaces and pre-configured profiles for quick installation that require minimal technical expertise. Make real-time adjustments via AVer PTZ Link software or the MT300(N) box, offering flexibility in dynamic meeting environments.

Benefits

- Active Participation: Give every participant a platform to be seen and heard.
- Efficient Meeting Management: Reduce manual operation with streamlined automated camera controls.
- Flexible Configuration: Compatible with a wide range of AVer cameras and Biamp Parlé microphones.

Compatible Products List

Biamp Devices:

- Biamp Parlé Ceiling Microphones
- Biamp Tesira Digital Signal Processor (DSP)

For more details, see: <https://www.biamp.com/products/product-families/parle>.

AVer Pro AV Cameras:

- Professional PTZ Cameras: PTZ300(N), PTZ200, PTZ300U(N)V2 Series
- Auto Tracking Cameras: PTC300(N)V2, TR300(N)V2, TR200 & TR300(N) Series

AVer PTZ Link Software

AVer Matrix Tracking Boxes:

- MT300(N) Series
